Dear Reader,

Thank you for taking the time to consider my application. I am a recent graduate from the Grant MacEwan University whom has obtained their Bachelor's in Computer Science and minor in Digital Design Experience. Combining my post-secondary experience with over six years of diverse work experience spanning software engineering, game design, education, and customer service; I bring a unique blend of technical ability, creativity, and people-focused problem-solving that I am excited to contribute to your team.

In my current role at Code Ninjas, I teach programming fundamentals to students aged 8-14, helping them develop games while guiding them through coding challenges in JavaScript, Microsoft MakeCode, HTML/CSS, and C# languages. I have also led workshops in Unity, Arduino programming, Robotics, and 3D printing. These experiences have sharpened my skills in communication, technical mentoring, and adaptability — all while reinforcing my passion for emerging technologies like Modelling and AI-driven applications.

My previous roles at The Rec Room and Tip Top Tailors further developed my customer engagement and multitasking abilities. From managing guest experiences across multiple attractions to providing tailored service in a retail setting, I've learned to work effectively under pressure while maintaining a positive, solutions-oriented attitude.

As a developer, I have built projects ranging from virtual reality based educational simulations to AI research in Unity, and conducted UX design audits backed by usability testing. I am confident in my ability to bring together technical insight and user-centered thinking to build tools and experiences that are functional, engaging, and impactful. I would welcome the opportunity to discuss how my skills and experiences align with your team's goals. Please feel free to contact me at your convenience.

Sincerely,
Nadir Bakridi
